

Inspections

TOTALMOBILE - Introduction

TotalMobile is a mobile working system that saves you time, money, gas and paperwork.

It's designed for any business or organization with people who spend some or all of their time on the road.

Using the appropriate devices they can:

- Schedule appointments and report when they have been kept
- Capture images to show that a job has been done
- Order new supplies
- Fill out official paperwork and file it without returning to headquarters
- Issue invoices when the job's done.

But that's only a tiny snapshot of TotalMobile's capabilities. In a nutshell, it can revolutionize the way you work, increasing profits and revenue and improving efficiency.

TOTALMOBILE

INSPECTIONS

Any type of Inspections is made simpler but much more efficient with TotalMobile.

Every possible piece of information you could need is reported instantly using a PDA or Tablet.

Your staff member arrives at the scene of an inspection. He or she spots a potential repair. The information is recorded and sent back to headquarters with a flag for urgency. The report includes a photograph for the benefit of the repair teams. The location of the work is pinpointed with the help of GPS.

What more could you need? Well, how about the facility to report a situation that could become a problem in, say, six months' time?

TotalMobile keeps you ahead of the game.

More importantly, it keeps your customers safe and protects you from litigation.
